Ok cool, I'll let Eben know that you will be reaching out to him to schedule some time at the test range. And please do let me know what you hear from Jacob Melby. Once we know the equipment has shipped, I'd like to try to nail down specific timing for deployment.

Dan,

That would be ideal for the pre-deployment testing. I don't have exact dates yet but it should be soon. I didn't receive any tracking information from Jacob Melby yet so I'm assuming the SPods have not shipped. I'll reach out to him today.

Hi Scott and Donna,

Eben Thoma offered to let us use the test range again, if needed, for any remaining pre-deployment testing. Please let me know if you'd be interested in using the test range.

Thanks,

-Dan

Hi Dan,

Without reading the QAPP, are you guys going to do pre-deployment testing of the new Sensit units you just purchased? If use of our test range would help make that easier, let us know.

Thanks,

Eben

Hi Dan,

I haven't talked with her but I think Libby and want to provide comments to support your project but we would need a little more time (totally slammed this week). Also, we are just completing some Sensit SPod comparison testing in Louisville (test ends today) and we can perhaps get a preliminary view on that to aid in the discussion. I will check on timing.

Thanks,

Eben

Subject: Updated Draft SPod QAPP, LaPlace, LA

Hello all,

Happy New Year! Attached you'll find a revised draft of the QAPP for the SPod monitoring project, updated to reflect that we will be deploying six Sensit SPods to the community monitoring locations around the Denka plant. We're planning for deployment early this year (exact dates to be determined). If you could give the QAPP another quick review and provide any comments by COB Friday (1/10/2020), that would be greatly appreciated. If you want to provide feedback but won't be able to respond by COB Friday, please just let me know when you'll be able to respond.

Regards,

Dan
